Professional Summary

Full-stack developer with hands-on experience building and deploying web applications in production. Strong focus on backend development, API design, and cloud deployment. Experienced with relational and NoSQL databases, authentication systems, REST API development, cloud deployment, and full-stack architecture using React, Node.js, ASP.NET Core, SQL Server, Azure SQL, Docker and PostgreSQL. Known for problem-solving, adaptability, and delivering reliable solutions.

Technical Skills

Backend: Node.js, Express, ASP.NET Core (.NET 8), REST APIs, Swagger, JWT Auth, Prisma

Frontend: React, TypeScript, Angular, Vite, Tailwind CSS

Languages: JavaScript, TypeScript, C#, Java, PHP, SQL, Kotlin

Cloud & DevOps: AWS, Azure SQL, Docker, Render, CI/CD

Databases: PostgreSQL, MongoDB, MySQL, SQL Server, Azure SQL

Tools: Git, Prisma ORM, Testing, Debugging

Projects

BookEase – Appointment Management System

Full-stack SaaS-style platform for managing clients, services, and appointments.

- Built with React, TypeScript, Node.js, PostgreSQL, Prisma
- Implemented JWT authentication and protected routes
- Designed relational database and full CRUD workflows
- Developed dashboard with appointment tracking
- Deployed on Render (frontend + backend + PostgreSQL)
